**Subject: 2023 Hazardous Waste Biennial Report for Los Alamos National Laboratory, EPA ID# NM0890010515**

Dear Mr. Maestas:

The United States Department of Energy and its field offices, the National Nuclear Security Administration - Los Alamos Field Office (NA-LA), and the Environmental Management - Los Alamos Field Office (EM-LA), in association with Triad National Security, LLC (Triad) and Newport News Nuclear BWXT- Los Alamos, LLC (N3B), collectively the Permittees, submit the enclosed 2023 Hazardous Waste Biennial Report (HWBR) in accordance with Section 2.12.5 of the Los Alamos National Laboratory (LANL) Hazardous Waste Facility Permit (Permit) to the New Mexico Environment Department - Hazardous Waste Bureau (NMED-HWB).

Enclosure 1 of this submittal provides LANL's Hazardous Waste Biennial Report for January 1, 2023, through December 31, 2023, to satisfy the reporting requirements as outlined in Section 2.12.5 of the Permit, and the electronically signed certifications for the Permittees.

LANL generates, stores, and treats hazardous and mixed waste onsite; however, all hazardous and mixed waste is disposed of offsite. The enclosed HWBR documents the management (i.e., generation, treatment, or disposal) of the Resource Conservation and Recovery Act (RCRA) hazardous and mixed waste containers at LANL during calendar year (CY) 2023. This information was compiled into the appropriate forms and uploaded to the 2023 RCRA/Info database Web Portal. This year's report contains 752 Waste Generation and Management (GM) forms. During CY2023, LANL generated 632,691.9 kilograms (kg) of RCRA hazardous waste and 674,500.3 kg of RCRA hazardous waste was shipped offsite.

- The United States Environmental Protection Agency (EPA) 2023 HWBR RCRA Subtitle C Reporting Instructions and Forms (PDF), page 51, identifies that hazardous wastewaters received by the Radioactive Liquid Waste Treatment Facility (RLWTF) are exempt from reporting; however, hazardous and mixed wastes generated by the RLWTF are sent to Technical Area 63 and then disposed at an offsite facility. These wastes are included in this report.

- In addition to EPA RCRA ID NM890010515, LANL also owns and operates a second hazardous waste-generating facility (Fenton Hill), EPA Handler ID NMD986676807. This facility did not

generate hazardous waste during CY 2023, and submittal of an HWBR is not required for this facility.

- The HWBR GM forms include a field (GM F.) that identifies whether a specific waste stream has been reviewed for waste minimization opportunities. This field has an affirmative entry “A” except for GM 1, GM 38, and GM 626 which have an “X” (no minimization data). LANL began implementing waste minimization efforts at the waste stream profile level during CY2013. Legacy wastes generated before 2013 are reported with an “X.” Even if LANL had implemented waste minimization efforts during the year, a given legacy waste was initially generated; therefore, field GM1 on the enclosed GM forms significantly under-reports LANL’s actual waste minimization efforts. Reviewers are referred to the report titled “2023 Los Alamos National Laboratory Hazardous Waste Minimization Report” (LA-UR-23-32618) submitted to the NMED-HWB in November 2023, which provides actual details of LANL’s facility-wide waste minimization program. Together, the 2023 HWBR and the Waste Minimization Report fulfill the requirements of 40 CFR Parts 262.41(6) and 262.41(7).

As recommended by the EPA and the NMED-HWB, LANL used the RCRA/Info database web portal to upload an electronic version of the 2023 HWBR data for EPA RCRA ID NM0890010515.

If you have any questions for Triad/NA-LA regarding the contents of this report, please contact Jason Hill (Triad) at (505) 551-2218 ([jshill@lanl.gov](mailto:jshill@lanl.gov)), or Robert Gallegos (NA-LA) at (505) 665-0450 ([robert.gallegos@nnsa.doe.gov](mailto:robert.gallegos@nnsa.doe.gov)).
